

Nationwide steel bolt manufacturer enjoys “riveting” performance by four Gold Seal® GS-60 conveyor-mounted label applicators.

The Packaging Challenge:

A major, multi-million-dollar manufacturer of threaded rods, bars and bolts needed to boost the efficiency of labeling boxes of bolts for distribution across the United States.

The Packaging Solution:

After doing its homework, the company chose to invest in four Gold Seal® GS-60 conveyor-mounted print/apply applicators. Installation went smoothly, and the applicators quickly became integral components of their packaging lines.

The Packaging Results:

The IT manager at this company reports that the Gold Seal® GS-60s are doing a great job. Each unit is consistently printing and applying 400,000 labels per year. He reports that the engineering design and quality components combine to provide a solid applicator that rarely needs service. When the company does need help, the Fortis Solutions Group team is responsive and extremely helpful.

So, before you purchase your next applicator, please explore the proven Gold Seal® line from Fortis Solutions Group. **Based on the real-life experiences of our customers, you'll bolt from the competition and enjoy doing business with us!**

Please contact us today to explore the possibilities.
