

Snack food packager goes nuts over Gold Seal GS-60 conveyor-mounted label applicator, buys 21 units with more orders to come.

The Packaging Challenge:

A packager of mixed nuts was searching for a label applicator to meet these precise needs:

- Packaging line space was limited, so the applicator had to be compact.
- They were running two shifts, so the applicator had to be reliable and maintenance-free.
- The applicator had to be versatile enough to efficiently and accurately print/apply labels on the top, front and back of deli-style tapered containers.

The Packaging Solution:

In 2005, after discovering Fortis Solutions Group online and meeting with our specialists, this company purchased three Gold Seal GS-60 conveyor print/apply applicators. Installation was smooth, and they were immediately integrated with the packaging line.

The Packaging Results:

Month after month, year after year, the Gold Seals have operated continuously during two shifts, five days a week, at a rate of 30 containers/minute. The company has serviced the print heads themselves. There has been no machine maintenance, and no need for service calls. The company has been so impressed that they have purchased a total of 21 Gold Seal applicators, with more orders to come.

So, before you purchase your next applicator, please explore the proven Gold Seal line from Fortis Solutions Group. **Based on the real-life experiences of our customers, you'll be nuts if you don't!**

Please contact us today to explore the possibilities.
